

UPPER DOLPA AND QUALITY OF EDUCATION

Upper Dolpa is one of the most rural regions of Nepal. With the villages far up to two weeks away from the capital city, the region hasn't experienced any significant infrastructure of development. Education remains one. People live semi-nomadic lifestyles and with families relying on subsistent farming, investing for education remains out of the equation. Extreme weather conditions, lack of awareness, geographical difficulties, etc. have all hindered in the education quality.
